

REACH - Conformity

January 2018

In June 2007 the REACH Regulation entered into force (Registration, Evaluation, Authorisation and Restriction of Chemicals in Europe). REACH regulates the handling of substances as such or of substances in mixtures and articles. This Regulation applies to all substances no matter being hazardous or not.

The products you purchase at ABL SURSUM are articles and in terms of REACH do not need to be registered. ABL SURSUM as a producer of electro-technics for housing installations and industrial appliances we are not standing at the beginning of the value chain. First of all we are a user of mixtures and articles (Downstream User).

The substances contained and as the case may be are due to registration therefore needed to be registered by our subcontractors. We ensured this corporately with our suppliers.

According to Article 33 of the REACH Regulation our suppliers have the obligation to inform us if a Substance of Very High Concern (SVHC) are contained in a concentration > 0.1 % (w/w) in a purchased product.

The identification of a substance as a Substance of Very High Concern is done by the inclusion to the so called Candidate List of the European Chemical Agency (ECHA). We are monitoring the REACH Regulation periodically and are in permanent contact with our suppliers. In case we receive relevant information, we will immediately notify you and take care that the substance is replaced by a less hazardous alternative.

Latest information on Substance of Very High Concern you will find under "Reach Customer Information" on our homepage www.abl.de.

Please direct any questions and suggestions either to: info@abl.de

Best regards

ABL SURSUM
Bayerische Elektrozubehör GmbH & Co. KG
