

RoHS/RoHS II-Conformity

June 2017

Even by now – apart from a few exceptions – new electric and electronic equipment, coming on the EU market have to do without lead, mercury, cadmium, chromium 6 or certain brominated flame retardants. Since 1st June 2006 the RoHS-Guideline 2002/95/EG1 – the abbreviation RoHS stands for „Restriction of the use of certain Hazardous Substances“- these substances have been restricted to minimum traces in the equipment. The new RoHS-Guideline 2011/65/EU2, also called RoHS-II, extend the scope of the substance restrictions in several steps and is going to cover all electric and electronic equipment. Some ABL SURSUM product lines are also affected by this extended scope. The significantly extended scope of the new RoHS faces generous transition periods. Electric and electronic equipment which is newly affected by the guideline generally has to meet the substance restrictions not till eight years, i.e. only from 22nd July 2019 on.

Although according to that all ABL SURSUM products are at the moment compliant, we voluntarily contribute to environmental protection and plan to produce all product lines newly affected by the RoHS-II according to the relevant threshold values as soon as possible. Newly developed products will meet the threshold values of RoHS-II from the start.

ABL SURSUM products, which have already been affected by RoHS, have been legally compliant since the due date 1st July 2006.

The necessary records according to the minimum standards of the European Guideline 2011/65/EU are created and kept for inquires of the market surveillance authorities or we committed our suppliers to do so. The verification of RoHS is done on the basis of Harmonised Standards, as far as these were published in the Official Journal of the European Communities. In any other case we will state our test regulations if requested.

Latest information on our products and our Integrated Management System for Energy, Quality, Environment and Health and Safety you will find on our homepage www.abl.de.
